

Lectures. Mon/Tue/Wed 10-11am in P/X/001

Problem Classes. Friday 10am in Weeks 3,5,7,9 in P/X/001

Seminars. Held in even numbered weeks 4, 6, 8, 10.

Lectures will begin at 10:05 and finish at 10:55. I always start and finish on time so that you can get to your next lecture.

Each lecture will be recorded and available for you to watch on Panopto later that day. You should attend all lectures, but if you are unable to do so for some reason (e.g. illness) then you can watch the recording afterwards.

The seminars will be more interactive and you are encouraged to bring your own questions from the problem sheets.

There will be four homework assignments throughout the term.

I will post these on Moodle at the beginning of Weeks 2, 4, 6, 8 and you will submit them via the link on Moodle by the due date (usually 5pm on the Tuesday of Weeks 3, 5, 7, 9).

We will then mark the homework and return it to you in plenty of time before the corresponding seminar in Weeks 4, 6, 8, 10, where you can ask any remaining questions from the assignment.

The homework for this term and next term will count for a total of 5% of your overall mark.

You are allowed to work together on the homework, but any solutions that you write up should be your own work in your own words. Simply copying someone else's answers is not acceptable.

The final exam will count for the remaining 95% of your overall mark.

Other information

Mask policy. Masks are not compulsory, but we request that you wear them during lectures and seminars for the benefit of your health and those around you.

Course notes. The lectures will be based on the course notes which are available on Moodle.

Other source material. There are a number of Calculus textbooks that you can use. Thomas' Calculus is recommended, but many others cover essentially the same material (e.g. Stewart's Calculus).

You can also watch the recordings of last year's on-demand lectures for more information. These may use different examples and may be arranged slightly differently, but they will cover the same material from the course notes.

Moodle Forum. You are encouraged to post questions on the Moodle forum. Typically I will not answer for a few days in order to give everyone a chance to participate and give hints on the questions.
